

Cockpit

## *Get the most comprehensive weather data available with XM WX Satellite Weather.*

Heads Up is your connection for putting the same proven technology used by broadcast meteorologists across the country directly into your cockpit. XM WX Satellite Weather provides pilots with NEXRAD radar, METARs, TAFs, Winds Aloft and Echo Tops at altitude, lightning data and much more. In addition to enjoying timely and vital information, you can also tap into one of the best values on the market with their limited-use subscription plans. XM WX Satellite Weather also features cost effective receivers and a wide range of display options. When combined with an appropriate receiver, over 200 channels of award-winning audio programming can be supported with the same antenna. To hear even more, talk to Heads Up today.

Satellite Digital Weather Services

## Electrical

Microprocessor Based	8 bit - 50 mHz RISC
Memory Type	Linear Flash
Memory Capacity	128K
Receiver Current (nom.)	XMD075 - .12A@28V XMD076 - .2A@14-28v
Antenna	Patch type, Combos
Databus Protocol	XMD075 - USB XMD076 - RS232

## Physical

Height	1.82 inches
Width	6.46 inches
Depth	7.30 inches
Weight	1.4 pounds

## Environmental

Storage Temperature	-67° ~ 185° F -55° ~ 85° C
Receiver Operating Temp	-49° ~ 158° F -45° ~ 70° C
Data Port Ops. Temp	5° ~ 158° F -15° ~ 70° C

## Testing / Certification

Hardware Environmental	RTCA DO-160D
------------------------	--------------

Specifications are subject to change without notice.

## XM WX Satellite Weather

Advanced digital satellite broadcast is the optimum method of transmitting the XM WX Satellite Weather data to aircraft anywhere within the continental US and its coastal waters. This advanced technology allows for dependable reception in any weather condition. Let Heads Up show you your options for aviation certified receivers and antennas that will deliver reliable, graphical weather information to your aircraft while in flight.

## XM WX Satellite Weather Information.

Having access to XM WX Satellite Weather provides pilots with a wide array of vital information and services, including:

- NEXRAD Radar (High Res)
- METARS
- TAFS
- TFRs
- Storm Cell Attributes
- Current Conditions
- AIRMETS and SIGMETS
- County Warnings
- City Forecasts
