Meet Compliance Challenges Head-On

Keeping up with annual testing of your fleet's Emergency Locator Transmitters (ELT) can be a challenge. 406Test.com provides quick, easy and accurate through-the-satellite testing of your ELTs.

- No expensive beacon testing equipment to buy
- No screen rooms
- No fear of a false activation

Through-the-satellite testing provides an authentic validation of your 406 MHz ELT.

With 406Test.com, there is no equipment to buy or install. Just create an account and get started! Unlike other ELT testers, you don't have to remove the ELT from the aircraft*. You can complete a routine beacon self-test in as little as 5 minutes. Then, just print off the satellite verification certificate for full compliance with FAA Part 91.

The FAA requires that any plane of any size have an annual, certified self-test of its Emergency Locator Transmitter. 406Test.com is, quite simply, the most affordable, easy-to-conduct means of testing your aircraft's ELT. Without ever removing the beacon, you can perform a through-the-satellite confirmation of battery operation and signal strength.

*You may need to remove beacon to test crash sensor.

Satellite Self-Test Makes Annual ELT Inspections Quick and Painless

ACR Cobham ground stations instantly alert inspectors via email/text messages

406 MHz self-test signal from ELT

COMPUTER PRINTOUT

ELT Satellite Self-Test

	Total Cost To Start Testing	Have Multiple Locations?
 BEST VALUE	\$60* *Includes 1st ELT Test \$30 Per Test After Registration 406TEST.com No Equipment To Buy Log on and go!	Use the same 406Test.com account and test beacons at each location for \$30 Per ELT
	\$5,000 - \$7,500 EQUIPMENT SET UP COST PER FACILITY Includes: Screen Room, Beacon Tester, Antenna Analyser	Purchase additional test equipment or transport equipment to and from each facility

Easy to Use

1. Log into your 406Test.com account and enter the aircraft's information
2. Perform a self test of the 406 MHz ELT (no removal required) directly through the SARSAT system
3. Verify that the self test was received by the satellites with SMS confirmation on your cell phone
4. Print the FAA-compliant certificate

Other ELT testing devices cost **thousands of dollars.**

With 406Test.com you can get started today for **as little as \$60.**

Database Management

House all of your vital aircraft, facility and beacon information in one easy-to-use database.

- Track which ELT is being used in a particular aircraft
- Receive email reminders when an annual inspection is due
- Receive reminders for battery and registration replacements
- Pull up ELT certificates from years past
- Perform self tests faster by having all of your aircraft, inspectors, facilities and ELTs pre-loaded into the system
