

eXchange™

High-speed Internet connectivity

Win the information game

There's been a major shift in today's global business environment. The "Golden Rule" – it's no longer whoever has the gold rules it's whoever has the information rules. And although local and international opportunities require you to spend more time away from your office, it is equally critical that no matter where you go, you are never out of reach of game changing information.

The solution is eXchange™ from Rockwell Collins. eXchange uses ViaSat's high-speed Internet hardware and Yonder® services to deliver satellite-based broadband to your aircraft's cabin. eXchange works with your laptop or Wi-Fi enabled devices so you can stay connected to e-mail, the Internet and your company's VPN. With eXchange you may be out of your office, but you are never out-of-touch.

Building trust every day

You are never more than a click away

Investing in a long-range business jet gives you an effective and valuable tool for searching out new opportunities wherever in the world they present themselves. But flying across states, regions, continents and oceans takes time. How much? More than you can afford to be out of touch with your office, home or competitors.

With eXchange in your jet's cabin, travel time is no longer an issue. You now have virtually instant access to the same information you have in your office. E-mail, FoIP, the Internet, VoIP telephony, and corporate Virtual Private Networks (VPN) are all just a click away. eXchange makes all these options easy to access on your laptop or Wi-Fi enabled smartphone.

How fast is fast?

eXchange is the fastest Internet connection available to business aircraft. In fact, you are able to access information as fast or faster than you would in your own office. eXchange delivers typical connection speeds from 1-2 Mbps to the aircraft and 128-1024 Kbps from the aircraft, anywhere in the Yonder service area.

Stay connected here, there – practically everywhere

Rockwell Collins eXchange doesn't only give you the fastest broadband connection available to business aviation it also gives you that connectivity in a rapidly growing number of places around the globe.

Coverage for eXchange using the Yonder satellite services are available in the areas where you typically travel. North America, Europe, the North Atlantic, Caribbean, across the North Pacific, Hawaii and parts of Central and South America. Currently, plans are in place for expanding to other regions.

Create the ultimate link

Like everything in today's rapidly changing business world, no two eXchange aircraft or usage patterns are alike. That's why we have partnered with Satcom Direct (Yonder) to provide you choices of services plans to ensure that your individual needs are met.

Stay connected. Stay informed. Stay one-step ahead

Your world moves fast. And there's only one airborne satellite system that delivers the reliable broadband speeds you need to stay ahead of your global competition – Rockwell Collins eXchange.

Global service and support from a trusted source.

Life cycle service solutions you can count on. From initial delivery and throughout your aircraft's life cycle, we are here with comprehensive service and support solutions. Our worldwide support network offers life cycle support solutions from options including performance-based maintenance and repairs, engineered solutions, rental exchange, training and simulation solutions; all backed by the best turnaround times in the industry. Rockwell Collins delivers reliable solutions, anywhere, anytime – every time.

Building trust every day.

Rockwell Collins delivers smart communication and aviation electronic solutions to customers worldwide. Backed by a global network of service and support, we stand committed to putting technology and practical innovation to work for you whenever and wherever you need us. In this way, working together, we build trust. Every day.
