

Upgrade your experience
and add in-flight Internet
to your Axxess system

ATG 4000

ATG 4000

Internet upgrade for Axxess

Already have an Axxess system? Easily add Gogo Biz[®] Internet service with the ATG 4000.

ABOUT ATG 4000

If you have Axxess for voice service, you can add Internet to your system with the ATG 4000. Enjoy seamless coverage aboard any aircraft across the Continental U.S. and portions of Alaska and Canada.

Surf the Internet, send and receive email, download files or log in to your corporate VPN. All as easily as if you were sitting in the office, a hotel or a neighborhood coffee shop. And, if you want to upgrade your existing voice service, the ATG 4000 offers crystal-clear voice service too — airborne calls that rival the quality of any on the ground.

PLANNED OBSOLESCENCE IS AN OBSOLETE CONCEPT

- Optional Internet add-on for Axxess cabin system
- Full mobile broadband - similar to a hotel or coffee shop (use your laptop, smartphone or tablet)
- Crystal-clear voice (optional) - similar to a mobile phone call on the ground
 - Up to two simultaneous calls
 - Compatible with the Gogo[®] OnePhone cabin handset
 - Compatible with personal smartphones (with Gogo Text & Talk service)
- Lightweight and modular
- Wide range of affordable service plans are available
- Wide Area Network (WAN) Management - allows automatic handoffs between SwiftBroadband and Gogo Biz
- Coverage in the Continental U.S. and portions of Alaska and Canada, starting at 10,000 feet above ground level (or higher).

ATG 4000
Internet upgrade for Axxess

**LIGHTWEIGHT EQUIPMENT.
STRAIGHTFORWARD INSTALLATION**

Since the ATG 4000 has no top-mounted antenna, in most cases aircraft interior headliners do not need to be removed for installation, saving labor and shortening downtime.

The ATG 4000 installation package is very simple and lightweight:

- ATG 4000 unit
- Configuration Module
- Two belly-mounted air-to-ground antennas
- Cabin Telecommunication Router (CTR) — for optional Wi-Fi service.
