## ATG 2000

Internet and voice

Stay connected to life below with Gogo Biz<sup>®</sup> Internet and voice.

### ABOUT ATG 2000

The ATG 2000 effectively and affordably provides a rich, fully-connected Internet and voice experience for up to five devices\*, making it ideal for aircraft with lighter passenger loads.

Surf the Internet and talk on the phone at the same time. Send and receive email with attachments. Log into your corporate VPN using your own laptop, tablet or smartphone. Enjoy seamless coverage aboard any aircraft across the Continental U.S. and portions of Alaska and Canada.

### BIG CONNECTIVITY FOR SMALLER PASSENGER LOADS

- Affordable lightweight equipment for use with Gogo Biz in-flight Internet and voice service
- Fast mobile broadband connection speeds via a seamless nationwide network of ground stations
- General web browsing and email (streaming video and audio services are not supported)
- Simultaneously connect up to five personal devices
- Crystal-clear voice (optional) - similar to a mobile phone call on the ground
  - Up to two simultaneous calls
  - Compatible with the Gogo<sup>®</sup> OnePhone cabin handset\*
  - Compatible with personal smartphones (using the Gogo Text & Talk service)
- The assignment of static IPs to customer devices is not supported
- Wide Area Network (WAN) Management not supported
- Coverage in the Continental U.S. and portions of Alaska and Canada above 10,000 feet above ground level (or higher).

\*Gogo OnePhone cabin handset does not count toward the personal device maximum

## LIGHTWEIGHT EQUIPMENT. SIMPLE INSTALLATION

Since it has no top-mounted antenna, in most cases aircraft interior headliners do not need to be removed for installation, saving labor and shortening downtime.

An ATG 2000 installation package is very simple and lightweight:

- ATG 2000 unit
- Configuration Module
- Two belly-mounted air to ground antennas
- Cabin Telecommunication Router (CTR) — for optional Wi-Fi service.
