ABOUT ATG 1000*

The ATG 1000 is basic connectivity that's anything but basic. For business passengers who want to stay ahead during flight, the ATG 1000 lets you crank through emails, plus use your own smartphone, with your own number, to make calls and send texts. And, coming soon, it will empower pilots by delivering connectivity to select cockpit and operational apps.

Affordable? It's our most affordable system. Send and receive attachments? Big or small, no problem. Performance? This is Gogo Biz network performance, with coverage throughout the U.S. and portions of Canada and Alaska. Scalable? Unlike other systems in the market, you can add features, such as web surfing, with a simple software update.

*Available soon

AFFORDABLE, BASIC CONNECTIVITY. HIGH-PERFORMANCE EXPERIENCE.

- High-performance email experience with attachments
- Calling and texting with your own smartphone, and your own number, in flight
- Support for select operational and cockpit applications**
- Compatible with the Gogo® OnePhone cabin handset (optional)†
- Make up to two simultaneous voice calls
- Simultaneously connect up to five personal devices
- Affordable, lightweight equipment
- Coverage in the Continental U.S. and portions of Alaska and Canada above 10,000 feet above ground level (or higher)

**Future capability

†Gogo OnePhone cabin handset does not count toward the personal device maximum

LIGHTWEIGHT EQUIPMENT. SIMPLE INSTALLATION

Since it has no top-mounted antenna, in most cases aircraft interior headliners do not need to be removed for installation, saving labor and shortening downtime.

An ATG 1000 installation package is very simple and lightweight:

- ATG unit
- Configuration Module
- Two belly-mounted air to ground antennas
- Cabin Telecommunication Router (CTR) — for optional Wi-Fi service.
