Aviator 300/350
Global connectivity

Stay in touch with your
business and your life.
Any time. Any where.
Around the world.

ABOUT AVIATOR 300/350

The Aviator 300/350 system brings SwiftBroadband service to your aircraft, giving you access to virtually everything you have in your home office, even as you are cruising miles above it, in places far from home. You can use your laptop, tablet or smartphone to securely log on to your corporate network, transfer data and send/receive email. You can also use it to surf the Internet or simply place phone calls.

The Aviator 300/350 equipment package is ideal for global service aboard virtually any business aircraft.

The Aircell Aviator 300/350 is available as a modular add-on to the Axxess voice system.

FLEXIBLE DATA RATES. SUPERIOR VOICE QUALITY. NO COMPROMISES

Gogo Business Aviation's SwiftBroadband data rates are based purely on the number of Megabytes (MB's) transferred each month. With no locked pricing plans and no overage fees, you're simply billed for the amount of data you use each month - and the more you use, the less you pay per MB.

Should you use your system merely to place and receive phone calls, you are assured that the quality of voice transmission will be better than ever.
